

FOLLOW OUR GOOD NAME!

Welcome to the SCC-family: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical industry, and, for more than 160 experts from different countries, a professional home. Our passion: managing registration and approval procedures for chemicals such as agrochemicals, biocides, etc. Our goal: to grow even further. In an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise as

CHEMIST OR FOOD CHEMIST (M/F/D) - REGULATORY AFFAIRS

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a team of currently 25 people – and right into our enormous diversity of projects
- Your tasks: strategic planning, commissioning and monitoring of test programs for physico-chemical and analytical methods, review and assessment of substance and product identities, technical and scientific contributions to biocidal active substance or product dossiers, management of complex regulatory applications for the approval of biocidal active substances and the authorization of biocidal products
- Your mission: in collaboration with your colleagues you will prepare biocidal active substance or product dossiers, plan and coordinate studies and engage in various regulatory projects
- Your focus: to obtain approvals/authorisations for our client's active substances/biocidal products in the European market

WHAT YOU OFFER

- Science degree in natural sciences (e.g. chemistry or food chemistry or related scientific disciplines)
- Preferably at least 3-5 years' professional experience in the field of physico-chemical properties and/or analytical characterization of (in)organic substances or products, as well as in the sphere of regulation (ideally with a focus on biocides)
- Sound knowledge of various analytical methods (qualitative as well as quantitative, e.g. spectroscopic methods, titration, chromatography)
- Determination and testing of physical / chemical properties
- Ability to tackle and coordinate complex tasks and projects effectively
- Experience with regulatory software tools such as IUCLID, R4BP3 and/or the SPC-Editor is of advantage
- Experience with the Regulation (EU) No 528/2012 (Biocidal Products Regulation, BPR) would be a plus.
- Good organization skills, a goal orientated way of working and timely observation of deadlines is a must
- Strong communication and presentation skills in German and English

WHAT WE OFFER

- Flexible working hours as well as the possibility of mobile working
- Intensive on-the-job training and opportunities for personal and professional development
- An appreciative working environment
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work

Do you thrive on challenging projects in an interdisciplinary team of ambitious professionals? Then apply online via the link below!
