

FOLLOW OUR GOOD NAME!

Welcome to the SCC GmbH team: We are one of Europe's biggest consultancy companies in the regulation sphere, a respected partner of the chemical and pharmaceutical industry, and, for more than 140 experts from different countries, a professional home. Our passion: managing registration and approval procedures for medical devices and chemicals such as agrochemicals, pesticides, biocides as well as pharmaceuticals. Our goal: to grow even further, in an international client environment. In the personal, open working culture of a family business that is focused on caring for its team. Located at the heart of the Rhine-Nahe region, alongside nature, but also right next to the vibrant Rhine-Main area. Expand our scientific expertise in our rising business area medical devices as

BIOLOGIST / PHARMACIST / MEDIC (M/F/D) REGULATORY AFFAIRS – MEDICAL DEVICES

BAD KREUZNACH

WHAT YOU CAN EXPECT

- Your path is taking you into a growing team – and right into our enormous diversity of projects
- Your task: preparation of conformity assessment documents (clinical evaluations, risk assessments, biological evaluations, etc.) for all types of medical devices
- Your mission: in collaboration with your colleagues you will perform literature and database searches and identify and appraise pertinent data. You will prepare clinical evaluations and risk assessments in line with the current regulations, standards and guidance documents, and engage in various regulatory projects
- Your focus: to obtain approvals/certifications for our client's medical devices in the European market

WHAT WE OFFER

- Opportunities for personal development
- Intensive on-the-job training and flexible working hours
- An attractive salary with profit-sharing, bonuses and benefits (company pension plan, food allowance, etc.)
- A very good working atmosphere in a team supported by corporate events and socialising outside of work (not currently because of the Corona Pandemic)

WHAT YOU OFFER

- Science degree in medicine / pharmacy / natural sciences
- Knowledge of clinical research methodology, information management, regulatory requirements, and medical writing
- Preferably at least 5 years' experience in medical device regulatory affairs or quality management of medical device companies
- Confident using of relevant databases and current office programs
- Ability to tackle and coordinate complex issues effectively
- A talent for organisation, goal orientation and awareness of deadlines
- Strong communication and presentation skills
